Professional Summary

A highly skilled and dedicated Full Stack Developer with over 2 years of experience in developing scalable and robust web applications. Seeking a challenging position to utilize my expertise in front-end and backend development, database management, and problem-solving to contribute to the success of a dynamic organization. Highly motivated to learn new concept and technologies.

Education:

Bachelor of Science, Engineering, University of Lagos (4.15 GPA), 2010-2015

Master of Science, Robert Gordon University, 2022

Skills:

- **Programming Languages:** JavaScript (ES6+), Golang
- **Frontend Technologies:** HTML5, CSS3, ReactJS, Typescript
- **Backend Technologies:** Golang
- **Backend Frameworks:** Gin-gonic, Gorilla Mux, Go-Chi, Gorilla WebSocket
- **Databases:** MySQL, MongoDB, PostgreSQL, SQLite, Redis, Elasticsearch
- **Version Control:** Git
- **Testing and Debugging:** Jest, Jasmine, Postman
- **Deployment and CI/CD:** Docker, AWS
- **Agile Methodologies:** Scrum, Kanban
- **Other:** RESTful APIs, NPM, git-bash, Linux, Data-driven micro-service

Professional Experience:

Global Performance Index, Remote

Software Engineer | August 2022 – March 2023

- Developed and maintained complex full-stack web applications using technologies such as ReactJS, Golang and MongoDB, resulting in improved user experience and increased customer satisfaction.
- Collaborated with cross-functional teams, including designers and product managers, to gather requirements and translate them into technical specifications.
- Implemented responsive and mobile-first designs using HTML5, CSS3, and modern front-end frameworks like ReactJS, resulting in improved accessibility and user engagement.
- Designed and implemented RESTful APIs for seamless integration between front-end and back-end systems, ensuring efficient data flow and system performance.
- Conducted thorough testing and debugging of applications to identify and resolve bugs, resulting in a stable and reliable product.
- Implemented continuous integration and deployment pipelines using Docker and reducing deployment time by 50% and improving development efficiency.
- Utilized version control systems (Git) to manage code repositories and collaborate with distributed development teams.

Decagon HQ, Software Engineering Company

Full Stack Developer | July 2020 – June 2022

- Developed and maintained a scalable e-commerce platform using Golang, ReactJS, and PostgreSQL, resulting in a 20% increase in sales.
- Designed using software best practices such as SOLID principles to ensure maintainability.
- Implemented database models, queries, and optimizations to improve system performance and ensure data integrity.
- Integrated third-party APIs, such as payment gateways and shipping providers, to enable seamless transaction processing and order fulfilment.
- Conducted code reviews and provided technical guidance to junior developers, promoting knowledge sharing and best practices within the team.
- Participated in Agile development processes, including sprint planning, daily stand-ups, and retrospective meetings, to ensure timely project delivery.

Most Recent Projects:

- **Debit Card Management Application for Providus Bank**

Description: Designed and built from scratch a micro-service application for a commercial bank to manage their debit card management system. The drive of this project was to have a good inventory, control over of the debit card distribution, enable customers to easily customize their debit card and more the application from on-premises to the cloud, to ensure a global view. My role as a full stack developer was to implement Restful APIs, develop responsive user-interface components, write unit tests etc.

Technologies Used: Golang, ReactJS, Typescript, Figma, HTML, CSS, MongoDB AWS

- **E-Commerce Web Application**

Description: Designed and built from scratch a data-driven e-commerce application for a client. The purpose of the application was to facilitate online buying and selling of products or services. It served as a platform that allowed the business owner to showcase its products to a wide audience and enables customers to browse, select, and purchase items conveniently from the comfort of their own homes. My role on this project was to design the models, implement Restful Apis, write unit test, design user-interface component, implement database management system etc.

Technologies Used: Golang, ReactJS, Figma, HTML, CSS, PostgreSQL

Certifications:

- Scrum Fundamentals Certification, SCRUMstudy, January 14, 2022, | 893022

Languages:

- English (Fluent)
